

UNDER PRESSURE?

NOT ANYMORE!

Constant Real Time Tyre Monitoring

Tire Watch is a tyre monitoring system that uses high tech tyre sensors to transmit Pressure and Temperature information to the display unit. Display information includes tyre pressure and temperature, alert warnings for low pressure and high temperature, as well as ambient temperature and a clock. The alert feature also allows independent front and

rear tyre settings. Tire Watch will benefit fuel economy, tyre wear and grip as well as increasing safety. For ease of use the valve sensors also have angled valves installed. Tire Watch fits all motorcycles, requires no wires and will be the best accessory you ever buy for yourself, your pillion and your motorcycle.

Only \$349

TOURING RIDERS

Enjoy the safety aspects as well as improved tyre mileage, fuel economy and grip.

SPORTS RIDERS

Monitor both temperature and pressure for maximum wear and grip.

RACING

As used by the Ten Kate Honda team.
